BRISTOL MUMS *Autumn's Warmest Breath*

No flower even approaches the Mum for fall color. Gardens would be desolate without it. No Mums can beat Bristol's! We raise several thousand seedlings of our own and test the best from elsewhere, too.

Constant attention to new varieties, new methods of growing and packing is bound to pay off handsomely. Try Mums from Bristol—birthplace of the Korean Hybrids, which first revitalized the Modern Mum.

Splendid perennials and shrubs also at your beck and call. Don't neglect your catalog envelope for more.

BRIEFLY, HERE'S ALL THERE IS TO GROWING MUMS:

SOIL—Any good, well-drained soil with some humus will do. We like our MUM-GRO, or a 5-10-10 formula as fertilizer.

EXPOSURE—Full sun, if possible.

PLANTING TIME—When spring frosts leave your area, but don't rush. Later planting makes for more restrained growth. The month of June is ideal for New England.

More detailed instructions accompany all shipments.

Our Guarantee

Shipments occasionally arriving in bad shape will be replaced without charge. Try to let us know within 5 days.

We, you and the plants are all living creatures, apt to fail each other at times. Let's all be tolerant of possible lapses. They surely are not intentional.

Ordering by mail from reputable firms assures you fair treatment. Also the specialist carries the best and latest available.

Plants We Ship, and When

Mums and some perennials will be from 2¼-inch pots, ready to grow for you. Other perennials and shrubs are from field-grown stock.

We ship at proper time for your area, unless you dictate otherwise. You can rely on us to decide properly.

Postpaid Policy

All orders amounting to \$3.00 or more postpaid east of the Mississippi (there must be some definite line established). West of the Mississippi, please add 10% to order.

BRISTOL'S OWN MUM FERTILIZER MUM-GRO

Once again we offer you Bristol's favorite chemical fertilizer. The high percentage of *root-making elements* in the formula *makes sturdy feeding roots*, and there is sufficient *nitrogen* for lush foliage, strong, straight stems and bountiful flowers *after rooting has started*.

May be broadcast at the rate of 1 lb. per 50 sq. ft., or for economy's sake give each plant a heaping tablespoonful at time of planting. Can be repeated at half strength in August if growth seems backward. Always cultivate and water in at once. Splendid also for other perennials and annuals. Safe, sure and productive—that's MUM-GRO!

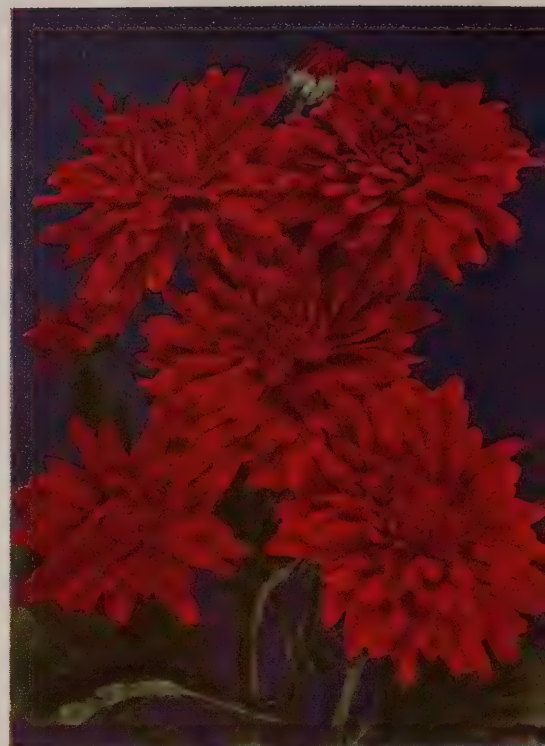

5-lb. bag \$1.60, postpaid (please add 25c west of the Mississippi). This is enough for 100 plants all year. Store in a dry, cool place.

Special! To Customers with Large Garden Space

If you have an estate, a big cutting garden, or simply want a lot of Mums, this may help you. We still prefer to offer only potted plants for safety's sake on smaller orders. However, if price prevents a large-scale venture on your part, try this idea:

We have a special sheet offering rooted cuttings to the amateur. These cuttings may be potted, grown on in flats or set right in the ground (with adequate watering). However:

1. At least 10 cuttings of a variety must be ordered.
2. Total order must be for at least 100 cuttings.

We will gladly send a list on application.
